GANPAT UNIVERSITY

B.Sc. (CA & IT) SEM-IV EXAMINATION (CBCS)

U14A1GUI : GUI PROGRAMMING

Time: 3 Hours] **Remedial Nov- Dec 2019** **[Total Marks: 60**

Instructions:

1. Figures to the right indicate full marks
2. Each section should be written in a separate answer book
3. Be precise and to the point in your answer

SECTION-I

1. Answer the following : (Any Five) **[30]**

(A) Explain Architecture of .Net Frame Work.

(B) Define Assemblies with its Elements.

(C) List out Category of Toolbox Control and Explain Common Control.

(D) Discuss advantages of OOPs.

(E) Define Inheritance in detail.

(F) Explain Text Box with Property, Methods and Event.

(G) Discuss .Net Data Provider.

SECTION-II

2. Answer the following: (Any Two) **[12]**

(A) Explain CLR with its Architecture.

(B) Write down steps to create Windows Application in C# and vb.net.

(C) Define JIT in detail.

3. Answer the following : (Any Two) **[12]**

(A) Explain Constructor with Example.

(B) Define Delegates in detail.

(C) Explain Checkbox Control with Property, Method and Event.

4. Answer the following : (Any One) **[06]**

(A) Explain ADO.net Architecture in detail.

(B) Discuss Execute Reader, Execute Non Query, Execute Scalar in detail.

B.Sc. (CA&IT) SEM-IV EXAMINATION (CBCS)
U14A2ADS: ADVANCE DATABASE MANAGEMENT SYSTEM

Time: 3 Hours] **[Total Marks: 60**

Instructions:

1. Figures to the right indicate full marks
2. Each section should be written in a separate answer book
3. Be precise and to the point in your answer

SECTION-I

1. Answer the following: (Any FIVE) **(30)**

[A] What is Locking mechanism? Explain Two phase Commit in detail.

Ans. Two-Phase Locking Protocol the Two Phase Commit is designed to coordinate the transactions of the requests to the system. The idea behind the protocol is to produce serialized results from a non-serialized system. This protocol requires that each transaction issues lock and unlock requests in **two phases: the shrinking phase and the growing phase**. During the growing phase transactions may obtain locks, but cannot release any. During the shrinking phase transactions may release locks but may not obtain any new locks. By following this protocol any update problems with the transaction can be detected and one transaction gets rolled back. It also can raise the priority of the affected transaction to prevent a repeat of the problem.

[B] What are the advantages of PL/SQL Block?

Ans. These are the Advantages of PL/SQL

Block Structures: PL SQL consists of blocks of code, which can be nested within each other. Each block forms a unit of a task or a logical module. PL/SQL Blocks can be stored in the database and reused.

Procedural Language Capability: PL SQL consists of procedural language constructs such as conditional statements (if else statements) and loops like (FOR loops).

Better Performance: PL SQL engine processes multiple SQL statements simultaneously as a single block, thereby reducing network traffic.

Error Handling: PL/SQL handles errors or exceptions effectively during the execution of a PL/SQL program. Once an exception is caught, specific actions can be taken depending upon the type of the exception or it can be displayed to the user with a message.

[C] What is OLAP? Explain in detail.

Ans. OLAP is a category of software that allows users to analyze information from multiple database systems at the same time. It is a technology that enables analysts to extract and view business data from different points of view. OLAP stands for Online Analytical Processing.

Analysts frequently need to group, aggregate and join data. These operations in relational databases are resource intensive. With OLAP data can be pre-calculated and pre-aggregated, making analysis faster.

OLAP databases are divided into one or more cubes. The cubes are designed in such a way that creating and viewing reports become easy.

Four types of analytical operations in OLAP are:

B.Sc. (CA&IT) SEM-IV EXAMINATION (CBCS)
U14A2ADS: ADVANCE DATABASE MANAGEMENT SYSTEM

Time: 3 Hours] **Remedial Nov- Dec 2019** **[Total Marks: 60**

Instructions:

1. Figures to the right indicate full marks
2. Each section should be written in a separate answer book
3. Be precise and to the point in your answer

SECTION-I

1. Answer the following: (Any FIVE) **(30)**

[A] What is Locking mechanism? Explain Two phase Commit in detail.
[B] What are the advantages of PL/SQL Block?
[C] What is OLAP? Explain in detail.
[D] How to handle errors in PL/SQL? Explain Named System Exceptions with example.
[E] Why trigger is most powerful object in DATABASE? Create trigger for Update event in PL/SQL.
[F] Write a PL/SQL program to display all data from CUSTOMER table using cursor.
[G] Difference between Data Warehouses and Data marts.

SECTION-II

2. Answer the following. (Any TWO) **(12)**

[A] What is transaction? Explain failure classification in detail.
[B] What is Cursor? Explain explicit Cursor in detail
[C] What are the objectives of Distributed Database?

3. Answer the following. (Any TWO) **(12)**

[A] Difference between Function & Procedure with example
[B] Discuss concurrency problem in detail with solution.
[C] Write a Stored Procedure program to update the salary column of a given empid. If the empid does not exist than give proper message.

4. Answer the following. (Any ONE) **(06)**

[A] Explain advantages of Distributed Database System?
[B] Explain Client/Server system in detail.

GANPAT UNIVERSITY

B.Sc. (CA&IT) Sem-IV EXAMINATION (CBCS)

U14A3WDC: WEB DESIGNING CONCEPTS

Time: 3 Hours] **[Total Marks: 60**

Remedial Nov- Dec 2019

Instructions:

1. Figures to the right indicate full marks
2. Each section should be written in a separate answer book
3. Be precise and to the point in your answer

SECTION-I

1. Attempt any Five Out of Seven: **(30)**

A. Discuss <form> along with different types of input elements.

B. What is CSS? What are the advantages of using it? Also, discuss three ways to embed it into HTML.

C. What is JavaScript? What are the advantages of using it?

D. Discuss the difference between SVG and Canvas.

E. What is DOM? Explain various methods of accessing and manipulating HTML elements into JavaScript.

F. Discuss alert (), confirm () and prompt ().

G. What is document.ready() event in jQuery.

SECTION-II

2. Attempt Any Two: **(12)**

(A) What is HTML? Explain HTML document structure.

(B) Discuss the semantics of HTML5.

(C) Discuss <audio> and <video> with example.

3. Attempt Any Two: **(12)**

(A) What CSS selector? Discuss ID selector & Class Selector with suitable example.

(B) Write down the JavaScript that print current date and time.

(C) Write down the steps to create a table using CSS.

4. Attempt Any One: **(06)**

(A) What is jQuery? Discuss FadeIn & FadOut effects with example.

(B) Explain jQuery callback() function with example.

U14A4NT1: NETWORK TECHNOLOGY-I

Time: 3 Hours] **[Total Marks: 60**

Remedial Nov- Dec 2019

Instructions:

1. Figures to the right indicate full marks
2. Each section should be written in a separate answer book
3. Be precise and to the point in your answer

SECTION-I

Q-1. Answer the following: (Any Five) **(30)**

1 Explain the types of computer network.
2 Explain the various types of switching.
3 Short note: HTTP
4 Discuss the sliding windows protocols in brief.
5 Explain the addressing in mobile IP in detail.
6 Discuss wired and wireless computer networks.
7 Explain the routing methods in brief.

SECTION-II

Q-2. Answer the following: (Any Two) **(12)**

1 Discuss various network topologies in brief.
2 Explain wireless LAN protocol in brief.
3 IPV4 VS IPV6

Q-3. Answer the following: (Any Two) **(12)**

1 Differentiate the TCP and UDP.
2 Short note: Cryptography
3 Connection oriented VS Connectionless services

Q-4. Answer the following: (Any One) **(06)**

1 Explain the phases of mobile IP.
2 Discuss the inefficiency in mobile IP.

B.Sc. (CA & IT) SEM-IV EXAMINATION (CBCS)

U14B6MIS MANAGEMENT INFORMATION SYSTEM

Time: 3 Hours] **Remedial Nov- Dec 2019** **[Total Marks: 60**

Instructions:

1. Figures to the right indicate full marks
2. Each section should be written in a separate answer book
3. Be precise and to the point in your answer

SECTION-I

1. Answer the following: (Any Five out of Seven) **(30)**

A What is MIS? Discuss problems with MIS.

B Describe Communication System with an example.

C What is Planning? Discuss Planning Terms (Elements).

D Write a short note on Level of Planning.

E Write a short note on Seven S-Model.

F Describe Types of Information System and explain any one in brief.

G Write a short note on Digital Signature.

SECTION-II

(30)

2. Answer the following: (Any Two) **(12)**

A What is Communication? Discuss different Communication methods.

B What is System? Define Open and Closed System with an example.

C What is Decision Making? Define Phases of Decision Making.

3. Answer the following: (Any Two) **(12)**

A Comparison Between E-Commerce v/s M-Commerce.

B Discuss Management Information System.

C Discuss Business Models of Electronic Commerce.

4. Answer the following: (Any One) **(06)**

A Discuss case study on College Management System.

B Discuss case study on Railway Reservation System.
