DD(BCA-MCA) SEMESTER - IV EXAMINATION (CBCS)

April - June 2023

U54A3DT3 - APPLICATION DEVELOPMENT TOOL -III

Time: 3 Hours] [Total Marks: 60

Instructions:

1. Figure to the right indicate full marks
2. Be precise and to the point in your answer

1 **Answer the following: (ANY SIX)** (30)

A) Explain .Net architecture with its important components in brief.

B) Discuss the compilation process of C# program.

C) What are advantages of OOPs? How to create object of class? Explain.

D) Explain any five methods of ArrayList object.

E) Explain CheckBox and CheckedListBox controls with its important properties and applications.

F) Explain Button, TextBox and Label controls with its important properties.

G) Discuss application of DataGridView control. How to bind DataGridView with data source.

H) Explain methods of SqlCommand object with example.

[P.T.O.]

2 **Answer the following in detail: (ANY ONE)** (5)

A) Define following terms

1. CLS 2. CTS 3. Managed Code
4. JIT 5. Garbage Collection (GC)

B) Explain Common language runtime in brief.

3 **Answer the following in detail: (ANY ONE)** (5)

A) Explain the exception handling with IndexOutOfRangeException.

B) What is polymorphism? Explain constructor overloading with suitable example.

4 **Answer the following: (ANY TWO)** (10)

A) How to show MessageBox with different button options on windows form?

B) Explain DateTimePicker control with example.

C) What is use of dialog controls? Explain ColorDialog and FontDialog controls in brief.

5 **Answer the following: (ANY TWO)** (10)

A) Explain architecture of ADO.NET.

B) Explain DataTable and DataSet classes in brief.

C) Write C# code to perform insert operation on student table using SqlCommand object.

Student(SId, SName, ProgramName, Semester)

DD (BCA-MCA) SEM-IV EXAMINATION (CBCS)

April - June 2023

U54A2OS2 OPERATING SYSTEM-II

Time: 3 Hours] **[Total Marks: 60**

Instructions:

1. Figures to the right indicate full marks
2. Be precise and to the point in your answer

1. Attempt any Six: **(30)**

(A) Write a note on Second Chance Page Replacement Algorithm.
(B) Write a note on UNIX file management.
(C) Explain secondary storage management in UNIX.
(D) Write a note on I/O buffering.
(E) Describe expr and test commands with a suitable script.
(F) Describe redirection with a suitable example.
(G) Describe various logical operators with a suitable script.
(H) Discuss various navigation options for words and lines in vi editor.

2. Attempt the following: **(12)**

(A) Consider the following page reference string:
1, 2, 3, 4, 2, 1, 5, 6, 2, 1, 2, 3, 7, 6, 3, 2, 1, 2, 3, 6.
How many page faults would occur for the Optimal page replacement algorithm? Assuming three frames. Remember that all frames are initially empty, so your first unique pages will cost one fault each.
(B) Write a note on RAID.

OR

(A) Consider the following page reference string:
7, 2, 3, 1, 2, 5, 3, 4, 6, 7, 7, 1, 0, 5, 4, 6, 2, 3, 0, 1.
Assuming demand paging with three frames, how many page faults would occur for the LRU page replacement algorithm?
(B) Discuss various security threats.

3. Attempt the following: **(10)**

(A) Describe wc and ls commands with their syntax, example and options.
(B) Mention different types of decision-making statements in Linux/Unix. Explain the if-elif-fi statement with its syntax and a suitable script.

OR

(A) Describe cat and cmp commands with their syntax, example and options.
(B) Mention different types of loop constructs in Linux/Unix. Explain anyone with an illustration.

4. Attempt the following: **(08)**

(A) Explain pipelining with a suitable code.
(B) Explain cut and paste filters with a suitable example.

OR

(A) Explain grep filter with its syntax and options.
(B) Discuss various modes in vi editor.
