M.C.A. SEMESTER-V EXAMINATION (CBCS)

P15A1ADMS: ELECTIVE-V (ADVANCE DATABASE MANAGEMENT SYSTEM)

Time: 3 Hours] Nov- Dec 2017 [Total Marks: 60

Instructions:

1. Figures to the right indicate full marks
2. Each section should be written in a separate answer book
3. Be precise and to the point in your answer

SECTION-I

1.(A) Do as directed. (08)

(1) Data Redundancy
(2) Types of Anomalies.
(3) What is Database Tuning?
(4) What is Distributed Database System?

2.(A) Answer the following Questions.(Any Two) (10)

(1) Explain Armstrong's Axioms that are used to prove FD.
(2) Describe 3NF with Example.
(3) How Index is useful for search Query? Justify with Example.

(B) Answer the following. (01)

(1) What is Benchmarking?

3.(A) Answer the following Questions.(Any Two) (10)

(1) How Vertical Decomposition is differing from Horizontal Decomposition?
(2) How Fragmentation and Replication are useful for Distributed Database System?
(3) Explain Conceptual Schema Tuning.

(B) Answer the following. (01)

(1) What is 2PC?

SECTION-II

4. (A) **Do as Directed.**

(1) Examples of Implicit Call and Explicit Call (08)

(2) Which Operators are used to Compare and Assign a value to Variable?

(3) How %Type and %RowType works?

(4) Define : Transaction

5.(A) **Answer the following Questions.(Any Two)**

(1) Explain Generic Structure of PL/SQL Block. (10)

(2) How Explicit Cursor Works?

(3) Write a PL/SQL block to read Employee's Eno from User and display Ename .Exception Section handle No_DATA_Found Exception if Eno does not exists.

(B) **Answer the following.**

(1) What is return value of SQL%Found? (01)

6.(A) **Answer the following Questions.(Any Two)**

(1) How Row Trigger is differ from Statement Trigger. (10)

(2) Explain Package with Syntax.

(3) Write a PL/SQL Function which gets String from User and return Length of string to calling PL/SQL Block.

(B) **Answer the following.**

(1) List out Oracle In Built Exceptions. (01)

M.C.A. SEMESTER-V EXAMINATION

P15A2AAD: Android Application Development

Time: 3 Hours] Nov- Dec 2017 **[Total Marks: 60**

Instructions:

1. Figures to the right indicate full marks
2. Each section should be written in a separate answer book
3. Be precise and to the point in your answer

SECTION-I

1.(A) Answer the following **(3)**

(1) What is activity?
(2) List out android terminology.
(3) Give names of tools available in SDK

1.(B) Give small example of manifest file and explain. **(5)**

2. Answer the following (Any Two) **(11)**

(1) What do you mean by resources in Android?
(2) List out menus available and explain any one.
(3) Give difference between style and theme using example.

3. Answer the following (Any Two) **(11)**

(1) Give example of List view.
(2) Create animation using rotate, alpha and scale.
(3) Give example of seek bar and progress bar.

SECTION-II

4.(A) Answer the following **(3)**

(1) List out types of preferences.
(2) What is the use of file output stream?
(3) Where preferences are stored?

4.(B) Give example of inserting record in SQLite database. **(5)**

5. Answer the following (Any Two) **(11)**

(1) Explain any one built in content provider.
(2) What is AsyncTask? Explain its methods?
(3) Can you create your own content provider? Justify.

6. Answer the following (Any Two) **(11)**

(1) Discuss telephony utilities.
(2) Show different ways of loading data in web view.
(3) Write and explain SMS receiving code.

M.C.A. SEMESTER- V EXAMINATION

P15A3AI:: ELECTIVE-VIII : ARTIFICIAL INTELLIGENCE

Time: 3 Hours] Nov- Dec 2017 [Total Marks: 60

Instructions:

1. Figures to the right indicate full marks
2. Each section should be written in a separate answer book
3. Be precise and to the point in your answer

SECTION-I

1. (A) **Answer the following** (08)
   - I Define "Heuristic Search".
   - II What is Intelligent Agent? And give proper example.
   - III What is local maximum?
   - IV What are difference between BFS and DFS algorithm?

2. **Answer the following (ANY Two)** (11)
   - A. What is hill climbing? Explain steepest-ascent hill climbing algorithm.
   - B. Define AI? Explain the characteristics of AI problem.
   - C. Explain the different issues in Knowledge representation.

3. **Answer the following (ANY Two)** (11)
   - A. Explain the Best-First-Search Procedure with example.
   - B. What is Natural Language Processing? Explain each step of NLP.
   - C. Describe Applications of Predicate Logic in details.

SECTION-II

4. (A) **Answer the following** (08)
   - I What is Red Cut
   - II List Prolog File operations?
   - III Write a Prolog Code to find nth Element from the given List.
   - IV List out real time expert system.

5. **Answer the following (ANY Two)** (11)
   - A. What is Expert System? Explain its Architecture, Features & applications in brief.
   - B. Write a short note on: Hopfield Networks.
   - C. Write a short note on "Applications of Artificial Neural Networks".

6. **Answer the following (ANY Two)** (11)
   - A. Write a prolog program to find factorial of a given number.
   - B. Explain cut and fail predicate with example.
   - C. Describe the Types of Agents in details.

P15A3NSQL - NOSQL WITH JAVASCRIPT

Time: 3 Hours] Nov- Dec 2017 **[Total Marks: 60**

Instructions:

1. Figures to the right indicate full marks
2. Each section should be written in a separate answer book
3. Be precise and to the point in your answer

SECTION-I

1. Answer the following. **(08)**

(1) Explain String to Number type conversion with example.
(2) List out different kinds of loop. Explain for in loop in javascript with example.
(3) Explain every() and filter() method of Array object
(4) Explain variable scope with example.

2. Answer the following (ANY TWO) **(11)**

(1) Explain Math object with properties and methods using example.
(2) Explain getElementsByClassName(), querySelectorAll() methods with example.
(3) Explain Location object with properties and methods using example.

3. Answer the following (ANY TWO) **(11)**

(1) Explain types of Popup Boxes with example.
(2) Explain following methods of Array object
sort(), filter(), concat(), pop()
(3) Explain addEventListener(), removeEventListener() methods with example.

SECTION-II

4. Answer the following. **(08)**

(1) Explain createCollection() and dropCollection() methods in MongoDB.
(2) Explain pretty() method with use, syntax and example.
(3) Explain skip() method with use, syntax and examples.
(4) What is MongoDB? Write down the advantages of MongoDB over RDBMS.

5. Answer the following (ANY TWO) **(11)**

(1) Explain Data types of MongoDB.
(2) Explain sort() and ensureIndex() method with proper example.
(3) What is Relationships? Explain Embedded Relationships and Referenced Relationships with proper example.

6. Answer the following (ANY TWO) **(11)**

(1) What is Covered Query? Explain it with proper example.
(2) What is Text Search? How to enable, create, use and delete Text index? Explain it with proper examples.
(3) Explain following conditional operations with their use, syntax and examples.
- Greater Than
- Greater Than Equals
- Not Equals

P15S4UML: OBJECT ORIENTED ANALYSIS AND DESIGN WITH UML

Nov- Dec 2017

Time: 3 Hours] [Total Marks: 60

Instructions:

1. Figures to the right indicate full marks
2. Each section should be written in a separate answer book
3. Be precise and to the point in your answer

SECTION-I

Q-1. Answer the following: (08)

I. Define the term model. What is the purpose of making a model?

II. Discuss forward and reverse engineering in brief.

Q-2. Answer the following: (Any Two) (11)

I. Discuss UML basic building blocks in detail.

II. What is class? Explain class attributes and operations in details.

III. Discuss the detail architecture of UML.

Q-3. Answer the following: (Any Two) (11)

I. Draw a class diagram of B2C for online shopping system.

II. Explain **"is-a"** kind of relationship with suitable example.

III. Explain interface, type and role with suitable example.

SECTION-II

Q-4. Answer the following: (08)

I. Discuss action state and activity state in depth.

II. Explain common modeling techniques in details.

Q-5. Answer the following: (Any Two) (11)

I. Discuss use case diagram with suitable example.

II. Explain activity diagram in depth.

III. What is forking and joining? Explain it with suitable example.

Q-6. Answer the following: (Any Two) (11)

I. Discuss deployment diagram with suitable example.

II. Write a short note on patterns and framework.

III. Explain collaboration diagram in detail with suitable example.
